Piesa trecere pentru cascada intre rigole POLYMAX BASIC DN100 H60 (H75) si H80 (H97)

Cod produs: 6307.1

Caracteristici	
Lungime, mm	110
Lățime, mm	3
Trecerea în cascadă H1>H2, mm:	60(75)>80(97)

Piesa de trecere, folosita la metoda evacuarei apelor pluviale prin metoda CASCADA, intre rigole cu inaltimea 75 mm si 97 mm. Solutia evacuarii apelor prin metoda data prevede amplasarea rigolelor intr-o linie orizontala, fara panta. Scurgerea apelor pluviale se datoreaza diferentei inaltimilor rigolelor, iar piesele de trecere servesc ca elemente de creare a diferentelor de inaltimi a liniei de rigole.
